Voluntary Remittance of Cigarette Tax on Cigarettes Purchased by Internet or Mail Order

Consumers who receive cigarettes in Kansas on which the cigarette tax has not been paid (has no Kansas tax stamp) are subject to a cigarette tax of \$12.90 per carton. This applies to purchases made through the Internet or mail order sales. To report and pay the taxes owed on the cigarettes purchased, complete this form, include your payment and mail to the address below.

The website where purchased and purchase dates are requested to ensure the department does not bill you for these same purchases upon receipt of sales data from the retailers. In addition to the cigarette tax, a Consumers' Use tax is also due, based on the total amount paid for the cigarettes.

Complete the information below and submit the tax due. The cigarette tax is computed by multiplying the number of cartons purchased by the tax rate.
