Brief Description: Petroleum Products Inspection Fee Increase
Keywords:
Effective Date: 07/01/1996

Body:

PETROLEUM PRODUCTS INSPECTION FEE INCREASES

The 1996 Kansas Legislature passed a law (SB704) modifying the existing Petroleum Products Inspection Law. These changes were part of a comprehensive package the Kansas Department of Agriculture introduced to provide for a fuel quality program and to increase accuracy within the Department of Agriculture's Weights and Measures Program.

The following items now in the Petroleum Products Inspection Law will change the reporting and payment requirements of the Petroleum Products Inspection Fee beginning July 1, 1996:

- The Petroleum Products Inspection Fee is increasing from \$.01 to \$.015 per barrel (one barrel equals 50 U.S. gallons).
- Diesel fuel is subject to the Petroleum Products Inspection Fee.
- The Petroleum Products Inspection Fee applies to exports and U.S. government sales.
- The Petroleum Products Inspection Fee no longer applies to kerosene.

If you have any comments or questions regarding this fee, please call this office at (913) 296-2411.

NOTICE 96-02 (7/6/96)
TO: Kansas Petroleum Products Inspection Fee Filers
RE: Changes in Petroleum Products Inspection Fee (Oil Inspection Fee)
